

# THE ROBBIN' GOBLINS: GAME SHEET

BY EXCO GAME STUDIO

A neon-stained **goblin heist** on a 5x5 grid. Every win kicks off **Sticky LockSpins** - winning symbols lock, reels re-spin, and the chain keeps going with **Extra Lives**. Above the reels, **Power Bar multipliers** build up and multiply the final win. See the multipliers go wild when they don't reset between spins in Free Spins.

# MECHANICS + GAMEX

## **GAMEX: POWER BAR MULTIPLIERS**

Each reel has a **Power Bar multiplier** shown above it.

- **Base game:** multipliers refresh every paid spin.
- **In Free Spins modes** multipliers are **persistent** between spins.

Wins are multiplied by the **sum of the Power Bar values up until the length of the win line**

## **STICKY LOCKSPINS + EXTRA LIVES**

Every win triggers a **LockSpin chain**: winning symbols **lock**, reels **re-spin**, and new matching symbols can become sticky during the chain. The chain continues until no progress happens and **Extra Lives** are depleted.

## **GOBLINS AND GOBLIN LIVES**

Landing Goblins on the reels will increase the Power Bar multipliers. Goblins also count as a win for LockSpin re-spins.

Extra lives may sometimes appear as Goblin Lives. They act as both Extra Lives and a Goblin that increase the multiplier of a random Power Bar position.

**SCATTERS ARE ON REELS 1,3,5. WHEN YOU GET 3 SCATTERS, YOU GET ONE OF THE FREE SPIN MODES SELECTED AT RANDOM. ALL FREE SPINS MODES USE PERSISTENT MULTIPLIERS AND AWARD 7 FREE SPINS.**

- **Free Spins mode 1:** More Goblins on the reels
- **Free Spins mode 2:** All Extra Lives are Goblin Lives
- **Free Spins mode 3:** Always 3 Lives - all Goblin Lives
- **Free Spins mode 4:** **Additionally**, more high value goblins and Power Bar cap increased from x99 to x999
