For patients with earlier-stage cancer,

I AM ON A MISSION TO CURE

[Click to access resources](#)

Actor Portrayal

Though your goal is to treat with a curative intent, you recognize that a cure is not possible for every patient.¹ That is why it's important to partner with your multidisciplinary team (MDT) to develop treatment plans, including consideration of systemic therapies, for appropriate patients with earlier-stage cancers.

Collaborate with your MDT to explore treatment options, including systemic therapies, to help achieve your goals.

Download These Earlier-Stage Cancer Care Resources

Risk of Recurrence in Certain Earlier-Stage Cancers

Information to keep in mind as you assess your patients' risk of recurrence in collaboration with your MDT

[Download](#)

Facilitating Conversations in the Oncology Multidisciplinary Team

Maximizing opportunities for collaboration and patient-centered decision making when working with your MDT
