SUBJECT LINE OPTIONS

Now that you are registered, it is time to put Pine to work.

PINE
PHARMACEUTICALS [Visit our website](#)

We are here to make your life easier.

We think of ourselves as your partner in patient care. Pine started as a compounding pharmacy in 1985 and then expanded to a 503B in 2014, so we know that you have come to rely on us for expertly compounded products. But we also want to do whatever we can to ease the ordering process and make your workdays less stressful.

Our latest: A brand-new ordering portal.

We rethought our website from your point of view, then filled it with the functions most needed by a busy medical practice. So you will still find the same expertly compounded products. But now you will find them in less time and with less trouble.

It all starts when you register. You probably noticed the difference already. No fuss. Fast approval. And it just gets easier from there.

Now you can customize your product views. Our new portal lets you be as specific—or as general—as you want. Focus your search by product, by medical specialty, or by type of practice. No time wasted.

And see product information without hype or hard sell. You will find a high-resolution photograph of the product followed by clearly stated storage information and an accurate BUD backed by our stability testing.

Then you can place an order—without worrying about minimums. We understand that patient needs are never predictable, so we never lock you into minimum or maximum orders.

We have also built in **one-click reordering**, **access to all your invoices** (so you can print and reprint them when needed), **shipment tracking through our site**, and multiple ways to **contact us** with your questions, concerns, or suggestions—because if you do not see the product you need, we can work with you to create it.
