Save draft may just be more smoke and mirrors as everything saves as you type it. The experience will be to go back to the list of jobs and keep it in the same queue
Shows some type of history... Maybe smoke and mirrors or voice over for actual functionality
Auto-updates based on changes to the Job
Double click does inline editing - use BNSF method
XLS like interaction. Click to create a new sign and start typing in new attributes
We'll start with a standard web form, and work towards a slicker interface time allowing
